Local Housing Profile Municipality series

Developed in partnership with:

INSTITUTE FOR
HOUSING STUDIES
at DePaul University

## **About the Local Housing Profiles**

The Local Housing Profiles are a curated set of housing data. The <u>Chicago Metropolitan Agency for Planning (CMAP)</u> provides these profiles for each of the 7 counties, 285 municipalities, and Chicago community areas (CCA) in northeastern Illinois.

Developed in partnership with the <u>Institute for Housing Studies at DePaul University (IHS)</u>, the Local Housing Profiles can be used by residents, practitioners, planners, and policymakers to understand the latest data on a community's housing demand, supply, and affordability relative to regional trends. These reports include data from a number of sources, including socioeconomic, demographic, and housing unit data from the <u>American Community Survey (ACS)</u>, and key housing market indicators generated from parcel-level administrative data and collected by the IHS via its <u>Data Clearinghouse</u>.

If you or someone you know does not have safe and permanent housing, you can dial 211 or visit <u>211metrochicago.org</u> to find help. Available across northeastern Illinois, 211 is a free, 24-hour service that connects residents to housing, food, utility payment assistance, healthcare, transportation, childcare, jobs, mental health, and more.

CMAP will update the Local Housing Profiles each year to reflect the most recent data available. The latest version is available on the CMAP website at <a href="mailto:cmap.is/local-housing-profiles">cmap.is/local-housing-profiles</a>. The data tables are also available on the <a href="mailto:CMAP Data Hub">CMAP Data Hub</a>. Please send questions to <a href="mailto:info@cmap.illinois.gov">info@cmap.illinois.gov</a>.

To improve these profiles in the future, CMAP wants to hear from you! Please take a quick <u>survey</u> to describe how you use this data and what you would like to see in future Local Housing Profiles.

#### **User notes**

#### Coverage

This snapshot is for Countryside, which does *not* extend beyond the seven counties of northeastern Illinois. For communities that extend beyond the CMAP region (for example, Sandwich, IL, extends into DeKalb County), data available from the IHS Clearinghouse (including market data and data on new homebuyers) includes only the portion that is within the seven counties. Municipal-level data derived from the ACS includes the entire municipality.

#### **Data availability**

Data on homelessness are not included in these profiles due to data availability and consistency.

Data from the IHS Data Clearinghouse on residential sales, mortgages, and foreclosure activity are not available for geographies within Kendall County. Additionally, data on new homebuyers are not available for a small number of municipalities where the underlying data are not well represented at the municipal level. This snapshot is for Countryside which is well represented by the analysis.

#### **American Community Survey definitions**

For data derived from the ACS, the Local Housing Profiles use terminology based on the <u>ACS subject definitions</u>. Definitions for certain ACS-derived indicators are included below some data tables.

#### **IHS Data Clearinghouse definitions**

The data derived from the IHS Data Clearinghouse include aggregated, parcel-level administrative data on all single-family; condominium; two- to four-unit; five-or-more-unit building sales (from deed recordings); mortgage loans (from lien recordings); and new foreclosure filings (from circuit court filings). Loan level data are sourced from the <a href="Home Mortgage Disclosure Act (HMDA)">Home Mortgage Disclosure Act (HMDA)</a> for first-lien, owner-occupied, home purchase loans of one- to four-unit properties. Additional definitions for certain IHS-derived indicators are included below some data tables.

#### Margins of error

The ACS is a sample-based data product. Exercise caution when using data from low-population communities, as the margins of error are often large compared to the estimates. Indicators for this project were selected to minimize the impact of high margins of error where possible. For more details on sample sizes and ACS guidance, please refer to the ACS sample size and data quality methodology. Data from the IHS Data Clearinghouse do not have margin of error concerns.

#### Mean of median values for ACS data

For aggregated geographies (CCAs and the CMAP region) where the underlying ACS tract-level data are reported as medians (like median gross rent or median income), a mean of median values is calculated and reported. For non-aggregated geographies (municipalities and counties), the median is reported.

#### Mean of median values for HMDA data

Home Mortgage Disclosure Act data are loan-level data that include only the census tract as the geographic indicator due to privacy concerns. Census tracts follow CCA, county, CMAP region, and some municipal boundaries. For areas where the tracts align, the median value for homebuyer income, purchase price, and loan amount are reported. However, most municipalities do not have boundaries that align with census tracts. For these communities, the IHS conducted geospatial and other analyses to identify tract relationships to CMAP region municipalities and estimate mean of median values. For more on this methodology, contact housingstudies@depaul.edu.

#### Comparing ACS data across past years

ACS five-year estimates are rolling samples that span a five-year period. When exploring trends, overlapping estimates should not be compared. The Census Bureau provides <u>guidance for comparing ACS data over time</u>. Please contact CMAP at <u>info@cmap.illinois.gov</u> if you have additional questions.

## Data for all households

These tables summarize the general demographic and social characteristics of all households in Countryside. The data provide useful context about the residents of a community for indicators that cannot be separated by owner or renter households due to sample size issues.

 $<sup>\</sup>verb|*Disability status| is defined as a person with a hearing, vision, cognitive, ambulatory, self-care, and/or independent living disability.$ 

## Housing characteristics and market conditions

These tables provide estimates of housing units in Countryside, categorized by structure size or type, and age, along with key housing market data. The market data includes the density per 100 residential parcels for each data type, enabling comparisons across different areas. Data is not available for Kendall County.

## Data for owner-occupied households and affordability for existing owners and new homebuyers

These tables highlight key economic characteristics for owner-occupied households in Countryside. Specific tables on housing affordability show housing costs and cost-burden status for current homeowners, as well as loan characteristics for recent homebuyers. Data on the median property value and mortgage amount for recent home sales provide context on regional variation in housing costs. Additionally, data on a typical homebuyer's income can help stakeholders create programs for developing new homeowners.

## Characteristics of recent home purchase loans for one- to four-unit properties,\* 2022-2023

	Countryside	Cook County	CMAP region
New homebuyers	254	93,002	168,252
Median homebuyer income	\$130,000	\$101,000	\$105,000
Median purchase price**	\$405,000	\$325,000	\$335,000
Median loan amount	\$331,667	\$285,000	\$285,000

 $Source: IHS\ Data\ Clearing house-IHS\ analysis\ of\ data\ from\ the\ home\ mortgage\ disclosure\ act\ of\ first\ lien,\ owner-occupied,\ one-\ to\ four-home\ purchase\ loans\ 2022-2023$ 

Universe: 1 to 4 unit home purchase loans

<sup>\*</sup>Data are not available for all communities within the CMAP region.

<sup>\*\*</sup>Median purchase price is the value of the property used to calculate the loan-to-value ratio of the loan. The difference between the loan amount and purchase price can serve as a proxy for a downpayment.

## Data for renter-occupied households and rental housing affordability

These tables highlight key economic characteristics for renter-occupied households in Countryside. Specific tables exploring housing affordability include data on renter incomes, rent, and cost burden status.

## Renter household size, 2023

	Cou	Countryside		<b>Cook County</b>		CMAP region
